# BLACKWELL NORTH AMERICA'S OUT-OF-PRINT SEARCH: THE FIND OF THE DECADE.

Consider the frustrating, time-consuming and costly task of locating out-of-print books yourself. Then consider Blackwell North America.

First, you get a decade of out-of-print experience in our OP Supervisor, Bob Langhorst, at right. A bookman, he works daily with the proven sources of OP scholarly titles—locating, evaluating and buying for B/NA customers.

Assisted by our computer, Bob's staff places your OP orders in our monthly publication, *Richard's Reference*. Our reputation as a volume buyer means we get prompt response, and fair quotations, from selected rare and second-hand book dealers in the United States, Canada, and Great Britain.

There is no cost to you until we find your book. With your permission, we will automatically supply titles priced under \$35 (or your specified limit). Often, we can offer a choice of condition and price from several available copies.

We keep you apprised, with quotations and condition reports, of all titles on search for you. If you buy through other B/NA programs, your orders can be automatically placed on out-of-print search, and you will be notified immediately.

But the true "find" is this: Within one year we locate over 40% of the titles for which we search. Current B/NA customer or not, our service is available at no risk to you. Simply call your Regional Sales Manager or nearest distribution center toll free.
