

## **PUBLIC SCHOOL PERSONNEL STUDY NEW TOOLS OF LEARNING**

The Audio-Visual Education Department of the North Carolina Education Association held its first State Conference for the study of the new tools of learning. Representative teachers, school librarians, school supervisors and administrators met at Brooks School, Greensboro, in November to evaluate programs in service.

The program consisted of lectures and demonstrations of the relative importance and usages of various type of audio-visual tools: Production of color slides, The opaque projector, The selection and use of filmstrips, Selection and use of 16mm films, Community resources, Tape recording, Radio, and Television. Greensboro school pupils demonstrated classroom use of 16mm film with Film Readers, a school FM radio program, and a local TV school program.
